INTRODUCTION

About names and their influence on the human psyche

Have you ever noticed how a name quite often perfectly reflects the personality of the individual named?

This intuitive connection we have with names and words runs very deep and is certainly persistent. Advertisers certainly understand this phenomenon. When a corporation prepares to launch a new product, they put a team of copywriters, public relations experts, even psychologists, together to come up with just the right name for the product.

The Name Advisor analyzes the kind of influence a name or a number, or a combination of both, has on the human psyche. By doing so, it will help you choose the right name for a child, an adult (name change), a product, a book title, a pet, a street address, a business name, a telephone number, a car license plate, and so forth.

The Name Advisor explains the name through three topics: Dominant Vibration, Heart Vibration and Base Vibration. The relationship between the different vibrations is given in Final comments.

The Dominant Vibration explains the initial and most strongly felt influence of a name. The Heart Vibration focuses on the vowel sounds.

The Base Vibration, which could be considered an underlying tone or rhythm, can apply to names as well as numbers - such as telephone numbers or social security numbers.

Although two names can easily have a similar - even identical – Dominant Vibration, the chance of two names also having the same Heart Vibrations and Base Vibrations is much smaller. Certainly the most important aspect to consider, is how the first three main influences fit together. That is explained in Final comments.
